Brief Carl Friedrich von Weizsäckers an Werner Heisenberg, 01.06.1944

Institut für theoretische Physik
Reichsuniversität Straßburg

Straßburg/Eis., den 1.6.44
Wimpelung Straße 2

Lieber Werner! Vielen Dank für Deinen Brief vom 17.5. Ich vermute heute
 vielleicht, Dich anzurufen und schreibe ^{neue} für meine Fragen dazu, die kleinen Ver-
 fahrung im Kauf nehmen. Darin Ausdruck, der für $x_1 \cot \theta x_1 - 1$ einsteht,
 habe ich auch erhalten; man kann ihn kurz schreiben: $x_1 \cot \theta (x_1 - x_0 + \rho_0) - 1$,
 wobei $x_0 = \gamma \rho_0$. Dann Du ihn auch für γ erhältst, geht um, dass Du eine
 Differentialtheorie für γ verwendest. Ich habe eine Deine alte Methode, die von Heisen
 auf Kepler angewandt wurde. Höcher hat zwar auch eine Differentialtheorie für
 γ gemacht, die aber je nach Wert von γ geb. Könntest Du mir schreiben,
 wie Du γ berechnest? Für so bekomme ich

$$w = \frac{c/4}{\int f(x)} \cdot \frac{\int df(12+18x)}{\text{Volumen d. Kugel}} = \frac{9c}{4f(x)} \cdot \frac{v_1^2 + 2(v_1^3 - v_0^3)}{v_2^3 - v_1^3} = 0,458 \frac{v_1^2 \dots}{v_2^3 \dots}$$

mit $c = 0,008$. Du hast durch Endformel mit dem Faktor 0,310. Ich halte für

und Forschung

Goals of nestor (1)

- create a network for information and communication about present and future LTP activities in Germany
- establish a cross-sectoral community to promote and support LTP activities and to raise awareness in society
- trigger synergies between on-going activities in Germany and cooperate with international partners and projects

Goals of nestor (2)

- establish a permanent organisation which coordinates and represents the concerns of long-term preservation

Network of Expertise in Long-Term Storage of Digital Resources

The project's objective is to create a network of expertise in long-term storage of digital resources for Germany. As the perspective of current and future archive users is central to the project, the emphasis is put on long-term accessibility. Within the project the following offers will be created: a web-based information forum, a platform for information and communication, criteria for trusted digital repositories, recommendations for certification procedures of digital repositories, recommendations for collecting guidelines and selection criteria of digital resources to be archived, guidelines and policies, the concept for a permanent organisation form of the network of expertise in digital preservation. The long-term goal is a permanent distributed infrastructure for long-term preservation and long-term accessibility of digital resources in Germany comparable e.g. to the Digital Preservation Coalition in the UK.

European Conference about the Preservation of Digital Resources, April 20-21, 2007 in Frankfurt

To coincide with the German EU Presidency, the Commissioner for Cultural and Media Affairs of the German Federal Government, and the Deutsche Nationalbibliothek, in conjunction with the partners of nestor - Network Expertise in Long-term Storage - are extending an invitation to experts and all interested parties in the European member states to come to the German National Library in Frankfurt am Main to discuss current issues and assess the prospects for long-term digital preservation. Results and experiences (1)

- Studies resp. different issues in libraries and/or archives and/or museums
- Working groups on different issues consisting of representatives from libraries, archives and museums
- nestor Memorandum on the long-term accessibility of digital information in Germany

Results and experiences (2)

- Importance of long-term preservation efforts is in the minds of all stakeholders and players in the field
- www.langzeitarchivierung.de is accepted as a specialised LTP "focus", ready for international cooperation
- LTP development projects benefit from the community building efforts of nestor
- A sustainable business model for a cross-sectoral competence network community is under preparation

Libraries, archives, and museums

- are dealing both with similar and completely different electronic material
- are facing both similar and completely different requirements
- are convinced of possibilities to find common solutions

Sustainability of LTP activities

- information and communication between experts and institutions
- public relations and awareness building
- education and training
- initiation of technical and organisational projects
- standardization
- international cooperation

Who benefits ?

- Libraries, archives, and museums
 - Academie institutions
 - Commercial enterprises
 - Government
- ⇒ the citizen
